JAMESTOWN INTRODUCES AUTOMATED SYSTEM CONTROL & PRODUCT FEED EQUIPMENT

Unless properly controlled and monitored, even the most sophisticated cooling and boiler water treatment program can fail. In fact, out-dated or malfunctioning equipment can quickly result in added manpower expenditures, increased water and chemical consumption rates and diminished system operating efficiencies. Fortunately, as a full-line water treatment company, Jamestown offers a diversified range

EQUIPMENT BENEFITS

• BETTER WATER TREATMENT RESULTS

By properly maintaining recommended chemical levels in the recirculating water and insuring that cycles of concentration are always consistent, the automated equipment will improve the performance of the entire program.

• IMPROVED PROGRAM ECONOMICS

Automated equipment will eliminate excessive water and chemical consumption rates and significantly lower manpower requirements, thereby providing significant cost reductions.

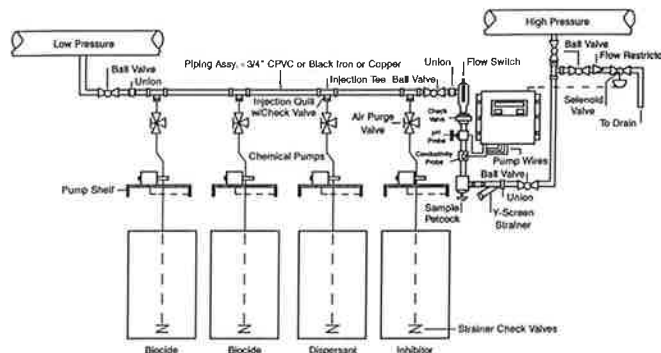

• INCREASED SAFETY

Automated equipment minimizes operator exposure to chemicals and greatly reduces problems associated with spills, burns and company liability.

• FAIL-SAFE PERFORMANCE

Our automated systems are designed to provide trouble-free operation. Systems can also be engineered to provide computer driven output for statistical process control studies.

TYPICAL LAYOUT: COOLING WATER TREATMENT PROGRAM & TOWER CONTROL AND PRODUCT FEED EQUIPMENT

of automated equipment, including tower and boiler controllers, chemical storage and feed systems and filtration devices to meet your requirements. The key to the Jamestown program, however, is our ability to design equipment packages that accurately address all of your engineering, performance and economic considerations. With our experience and technical know-how, we can properly analyze your needs and then prepare a package that will get the job done as cost-effectively as possible.

As a representative of some of the industry's leading equipment manufacturers, Jamestown is able to select the most appropriately matched devices to suit your needs. We don't limit ourselves, or you, to a single manufacturer, so we can provide the finest customized system available.

Whether you need replacement components or a total system upgrade, we can offer a complete line of advanced water treatment control and feed equipment – all from one reliable source. Our engineering services will also insure that recommended equipment packages maximize the consistency, performance cost-efficiency and safety of your chemical treatment program.

For over 20 years, your leading source for advanced water treatment technology – **Jamestown Technologies**
