

**Making
“Specialty
Chemicals”
a less
draining,
more
profitable
experience.**

The same “specialty” chemicals you need. The same “specialty” chemicals you use.
The same “specialty” chemicals probably are costing you more than they should be.

They can cost less. Sometimes a lot less.

Made by some of the same manufacturers, available at much lower prices.
We don't remix them, use inert fillers, dilute or cut them... just discount the price you pay.

How can Jamestown Technologies do it?

We've provided specialty chemicals for the water treatment industry since 1972. Like pharmaceuticals, there are generic options that are directly formulated for the paper industry and, like pharmaceuticals, there are volume purchase discounts that we can pass on directly to our customers. Discounts are available on products such as...

- Defoamers
- Biocides
- Deinking chemicals
- Felt and wire passification
- Scale control treatments
- Felt wash chemicals
- Deposit control agents
- Boilout chemicals
- Polymers / retention aids
- Water treatment / boiler chemicals

Can you afford to wait?
